WALL MOUNTING INSTRUCTIONS

EXPECT CRATE THINGS

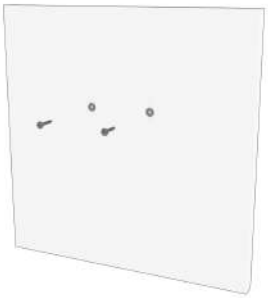

1

Insert the two 3D-printed mounting brackets and markers into the top two diamond tiles on the back of the PixelPanel.

2

Hold the PixelPanel against the wall in your desired location and press firmly to transfer the screw marks.

3

Remove the panel and install the wall anchors at the marked points. Thread the screws into the anchors, leaving about 1/8" (0.125") exposed.

4

Remove the markers from the mounting brackets, then hang the PixelPanel onto the exposed screws.

5

Step back and enjoy your PixelPanel — whether you're viewing it up close or from across the room.
